Internet Telephony Gateway

with 4 FXO Ports

Quick Installation

VoIP
Voice

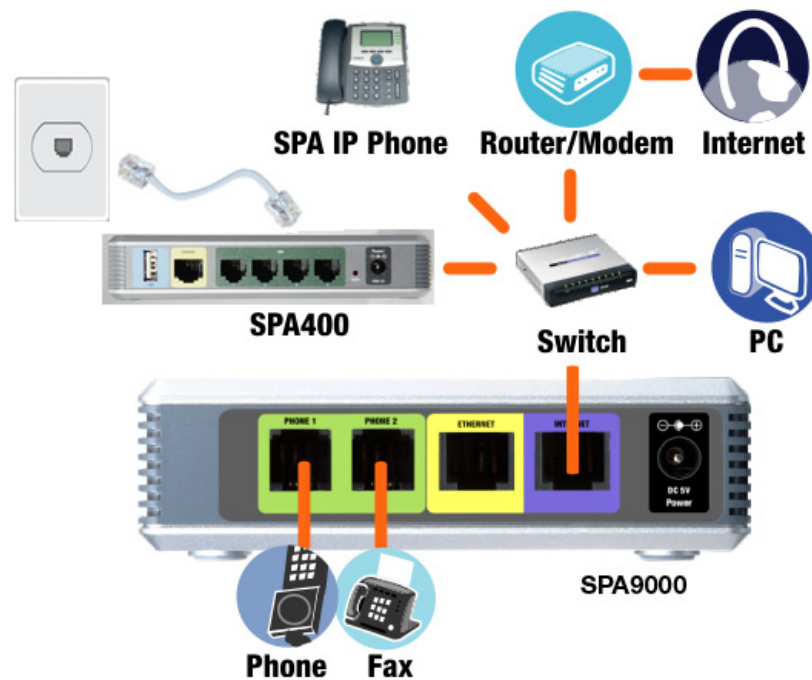

Model No. **SPA400**

1 Before You Begin

IMPORTANT:The SPA400 can only be used with the SPA9000. After connecting the SPA400 as shown below, complete the configuration by using the SPA9000's Setup Wizard. For advanced configuration options refer to the SPA400 section of the SPA9000 Administration Guide.

The SPA400 is an integrated part of the Linksys Voice System (LVS). The SPA400 provides connectivity to the PSTN network and has an integrated voice mail application available on the same platform.

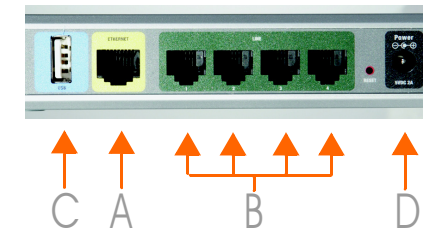

This guide displays how to connect the SPA400 to the SPA9000. For detailed system configuration steps, including setting up the voice mail application, use the SPA9000 Setup Wizard (downloadable from www.linksys.com) or refer to the SPA400 section of the SPA9000 Administration Guide.

Linksys Voice System Overview

2 Connecting the SPA400

- Connect the included ethernet network cable from the ethernet port on the SPA400 to the ethernet port on the multi-port switch.
- Plug one end of a supplied RJ11 telephone cable into one of the line ports on the SPA400 and the other end into the RJ11 wall outlet.
- Plug in the included USB 1.1 voice mail module into the USB port.
- Connect the included power adapter to the power port on the SPA400 and then plug the power adapter into an electrical outlet.

The SPA400 connection is complete. After completing the SPA9000 setup, you can use the SPA9000 Setup Wizard or refer to the SPA400 section of the SPA9000 Administration Guide for advanced configuration options.

For additional information, refer to the SPA9000 Administration Guide available on the Linksys website. If further assistance is needed, contact your Internet Telephony Service Provider.
