Getting started with Adobe® Reader®

Adobe Reader is the gold standard for reliably viewing PDF documents on Android™ phones and tablets.

Let's take a look at the ways you can use PDF documents with Adobe Reader.

Swipe to the next page to get started!

I have PDF documents saved in my email and bookmarked in my web browser, plus a whole bunch more in other apps.

How do I open them with Adobe Reader?

Opening PDF documents with Adobe Reader is as simple as tapping your finger. Swipe ahead to see how.

✉ Email

In your email app, tap the **View** button next to the attach icon ⬯. Easy!

Tip: Select the Use by Default option to use Adobe Reader for all your PDF documents.
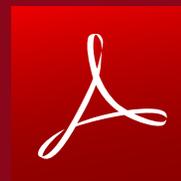

Web browser

When you open a PDF link in your web browser, it is saved in your **Downloads** widget. Simply tap the PDF file you want to open.

Here, there, and everywhere

If your PDF document is stored in another app, you can often open it by tapping the document icon or filename.

My PDF documents are in Adobe Reader. Now what do I do?

Tap the middle of the screen once to reveal the toolbars. After a few moments, they disappear until you tap again.

How do I get from one page to another?

Tap the document icon 📄 in the toolbar to change how you view pages. Go with the flow or view one page at a time!

- In **Continuous**, swipe up or down on the screen to change pages.

- In **Single Page,** swipe left or right to change pages. Or tap the right or left edge. Go ahead, try it now!

Get right to the point with document scrubbing.

When your PDF document has five or more pages, a handy scrubber bar appears at the bottom of the screen.

Remember to tap the middle of the screen to bring up the toolbars.
