

Casey Cluster Network site map  
(Proposed)

**About site maps**

Site maps show the structure of a website's content to help users or search engines navigate the site.

Using a site map will make your website more user friendly and will help you avoid duplicating content.

This site map is used to:

- Visualise the hierarchy of a website's pages.
- Prioritise what is important content to feature on a website.
- Map out future pages to build on a website.

**Legend**

- Homepage
- Main navigation
- Secondary page
- Secondary group of pages
- Future page
- Future group of pages
